3. We do not own registered office which is used by us currently.

The premises where the registered office of our Company is located, is not owned by us. Our company has taken the said premises on lease for a period of 60 months commencing from March 01, 2023. There can be no assurance that the term of the agreements will be either continued or renewed for further period, and in event the lessor/licensor terminates or does not renew the agreements, we may require to vacate the registered office and identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of business, time overruns and may adversely affect our operations and profitability and brand image also.

For further details, please refer to Chapter titled **“Business Overview”** beginning on page **89** of this Draft Prospectus.

4. We operate in highly competitive markets, and fragmented market with low entry barrier.

The IT industry is highly fragmented as there is competition from various organized and unorganized players. Competition occurs generally on the key attributes such as quality of services, customer support network, pricing and timely delivery. Low entry barriers in the IT Sector encourage new entrants to enter this industry with new business models.

We also face competition from the big and established players operating in the IT Sector, who might have better resources and experienced team at their disposal. Further, the new entrants may offer work on lower price margins to increase their customer base. Some of our existing and potential competitors enjoy substantial competitive advantages, including: longer operating history, the capability to leverage their sales efforts and marketing expenditures across a broader portfolio of products, more established relationships with a larger number of suppliers, access to larger and broader user bases, greater brand recognition, greater financial, marketing, distribution and other resources, more resources to make investments and acquisitions and the ability to bundle competitive offerings with other products and services. Intensified competition may result in pricing pressures and reduced profitability and may impede our ability to achieve sustainable growth in our revenues or cause us to lose market share.

5. We are highly dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these customers may have a material adverse effect on our profitability and results of operations.

We depend on certain customers who have contributed a substantial portion of our total revenues. Our top 10 customers accounted, cumulatively, for 66.16%, 83.72%, 65.45% and 64.23% of our revenue from operations for the six months period ended on September 30, 2023 and in Fiscals ended March 31, 2023, March 31, 2022 and March 31, 2021 respectively. There is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers.

Reliance on a limited number of customers for significant revenue may generally involve several risks. These

risks may include, but are not limited to, reduction, delay or cancellation of orders from our significant customers, failure to renegotiate favourable terms with our key customers, the loss of these customers entirely, our inability to meet the expectations to track the changing preferences of our customers or non-acceptance of our products by customers, all of which would have a material adverse effect on the business, financial condition, results of operations and future prospects of our Company. In order to retain some of our existing customers we may also be required to accept terms to such customers which we may place restraints on our resources.

Maintaining strong relationships with our key customers is, therefore, essential to sustain the growth of our business. The loss of any key customer may significantly affect our revenues, and we may have difficulty securing comparable levels of business from other customers to offset any consequent loss.

6. Our top ten suppliers contribute majority of our purchases. Any loss of business with one or more of them may adversely affect our business operations and profitability.

Our top ten suppliers contributed approximately 99.06%, 89.23%, 89.93% and 93.62% of our total purchases for the period ended September 30, 2023 and for Fiscal ended March 31, 2023, March 31, 2022 and March 31, 2021 based on Restated Financial Statements. However, our top suppliers may vary from period to period depending on the demand-supply mechanism and thus the supply process from these suppliers might change as we continue to seek more cost-effective suppliers in the normal course of business. Since our business is concentrated among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited on account of any dispute or disqualification. While we believe we have maintained good and long-term relationships with our other suppliers too, there can be no assurance that we will continue to have such a long-term relationship with them. We cannot be assured that we shall do the same quantum of business, or any business at all, with these customers, and loss of business with one or more of them may adversely affect our purchases and business operations.

7. Our Company has reported certain negative cash flows from its investing activity and financing activity, details of which are given below. Sustained negative cash flows could impact our growth and business.

Our Company had reported certain negative cash flows from its investing activity and financing activity in the previous years as per the restated financial statements and the same are summarized as under:

Amount in Rs. Lakhs

Particulars	For the 6 months period ended September 30, 2023	For the year ended March 31		
		2023	2022	2021
Net cash (used in) Investing Activities	234.33	681.76	(1,085.40)	(202.28)
Net cash (used in) / from financing activities	(367.85)	(1,100.49)	(729.30)	(227.66)

8. Changes in technology render our current IT equipments obsolete and require us to make substantial capital investments.

The technology requirements for businesses in the IT sector are subject to continuous change and development. Our inventory of existing IT equipments becomes obsolete on introduction of newer and better technologies. We must continuously update our existing IT equipments in order to meet our clients' requirements and remain competitive in this market. In addition, rapid and frequent technological and market demand changes often render our equipments obsolete and result in requirements for additional and substantial capital expenditures and/ or significant write downs of our assets. The cost of upgrading our existing equipments could be significant. Our inability to successfully adopt new technologies in a cost effective and a timely manner could increase our costs and adversely affect our competitive position in terms of pricing or quality of service. Further, if we fail to anticipate or respond adequately to our clients' changing requirements or keep pace with the latest technological developments, our business, prospects, financial condition and results of operations may be materially and adversely affected.

9. Our business relies heavily on capital investments. If we cannot secure additional funds when required, or if the terms are not favorable, we may need to scale back or even abandon our expansion and growth initiatives. This could also entail reducing capital spending and the scale of our operations, any of which could have a significant and negative impact on our business, financial standing, and operational results.

We require a substantial amount of capital for the procurement of IT equipment, such as laptops, desktops, printers, servers, and various peripherals, including projectors and storage devices. Failing to secure additional

financing on commercially acceptable terms could have a negative impact on our ability to expand our business and enhance or sustain future profitability. As of September 30, 2023, March 31, 2023, March 31, 2022 and March 31, 2021, our net fixed assets amounted to ₹988.29, ₹989.78, ₹1,205.38, and ₹1,271.21, respectively, with gross asset values of ₹ 4,718.64, ₹ 4,708.82, ₹4,624.30, and ₹ 4,764.64, respectively.

Additionally, we need funds to mobilize resources before receiving payments from clients. Consequently, we may need to incur further debt in the future to meet our capital expenditure and working capital needs. Our ability to secure such financing on favorable terms is contingent on various factors, including prevailing economic and capital market conditions, credit availability from financial institutions, investor confidence, our current debt levels, operational results, cash flows, and external factors beyond our control.

There is no guarantee that we will be able to access additional financing in a timely manner or at all. If we are unable to obtain the necessary funds when required or on terms we find acceptable, we may be compelled to downsize or even abandon our expansion and growth plans, or reduce capital expenditure and the scope of our operations. Any of these outcomes could have a significant and detrimental impact on our business, financial position, and operational results.

10. If customers choose not to outsource their IT product needs or if there is a decline in the demand for IT equipment rentals, it may negatively impact our business, financial performance, financial health, and cash flow.

The majority of our operational revenue is derived from our IT equipment rental business. In Fiscal 2023, revenue from IT rental services and the sale of used IT equipment accounted for 75.60% and 14.85% of the total operating revenue during that period, respectively. Although we have successfully served clients across various industries and sectors, there is no guarantee that they will continue to outsource their IT equipment needs in the future. Our customers choose to outsource their IT product requirements to us for various reasons, such as budget constraints, convenience, and operational flexibility. However, there is no assurance that our customers will persist in outsourcing or increase their outsourcing share of product requirements to us. If our customers decide to discontinue third-party outsourcing of their IT needs or if there is a declining trend in the IT equipment rental business, it could have an adverse impact on our business, financial performance, financial condition, and cash flows.

11. We generally do business with our customers on purchase order basis and do not enter into long term contracts with them. Our inability to maintain relationships with our customers could have an adverse effect on our business, prospects, results of operations and financial condition.

Our business is dependent on our continuing relationships with our customers. We do not have written agreements with our clients and we undertake the assignment based on orders received from them. These arrangements are solely based on either long-standing relationship with such customers or customers reputation. Our inability to enforce these oral arrangements/unavailable agreements on substantially the same terms as agreed, or at all, could adversely affect our business and results of operations. Any change in the buying pattern of our customers can adversely affect the business of our Company.

Further, in the absence of definitive agreements, there can be no assurance that such clients will honour their obligations or continue to be associated with us in the future, on reasonable terms, or at all, or that such clients will not terminate or alter their arrangements with us at short notice or at their sole discretion.

Our business depends on the continuity of our relationship with our customers. There can be no assurance that we will be successful in maintaining such relationships or increasing the number of such relationships. If we are not able to maintain existing relationships with our current customers or if we are not able to develop new relationships, or if we are not able to provide services on a timely basis or offer services that meet the needs of the customers, the number of customers could decline in the future and as a result, our business, prospects, results of operations and financial condition could be adversely affected in the future.

The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

12. We have not entered into any long term or definitive agreements with our Suppliers. Our inability to obtain necessary inventory from our Suppliers in a timely manner, in sufficient quantities and / or at competitive prices could adversely affect our operations, financial condition and / or profitability.

Our business is dependent on our Suppliers for procuring the inventory used by us in our business. Typically, we do not enter into long term contracts with our suppliers and prices for IT equipment sourced by us are normally based on the quotes we receive from various suppliers on an ongoing basis. Therefore, there are no fixed terms and conditions on which we purchase inventory for our business operations. Further, fluctuations in the price and availability of the latest and advanced IT equipment, could have a material adverse effect on cost of sales or our ability to meet customer demands with respect to pricing and quality.

There can be no assurance that we will always be successful in our efforts to protect our business from the volatility of the market price of the IT equipment inventory, and our business may be adversely affected by dramatic movements in the prices of various IT equipment. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. In the event that we fail to secure sufficient quantities of inventory from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance and cash flows may be adversely affected. Further should there be any significant increases in prices of the IT equipment, and we are unable to pass on such increases in prices to our customers or find alternative suppliers / sources for supply of IT equipment at competitive prices, our business, operations and financial performance could be adversely affected. Further, such factors can also lead to delay in delivering our products to our customers in a timely manner or at all thereby exposing us to the risk of losing our customers or not obtaining repeat orders from them.

13. Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.

We generate major domestic sales through our customers situated in Maharashtra. For 6 months period ended September 30, 2023 and for the financial year ended March 31, 2023, our revenue from Maharashtra region represented 94.67% and 84.11%, respectively, of the revenue from operation for such period. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region, which may adversely affect our business prospects, financial conditions and results of operations.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local customers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

14. A substantial rise in IT equipment repair and maintenance expenses exceeding our budget, or the inability to deliver high-quality customer service and support, could harm our relationships with both current and potential customers. Consequently, this could negatively influence our business, operational outcomes, and financial stability.

We are obligated to allocate funds for repairing and maintaining our IT equipment, and there is a possibility that we may not recover these costs. Apart from providing repair and maintenance services to our clients in normal course of business, we engage third party services providers for the repairs and maintenance of the IT equipment which are available on-site of the client company, but which were not procured by us. In such scenario, we generally charge the client company for the repairs and maintenance and make forward payment of the same to the third party service provider. Any substantial increase in these repair and maintenance costs, exceeding our budget and lacking corresponding revenue, could escalate our expenses and negatively impact our financial performance and overall financial health.

Furthermore, any failure on our part to deliver quality customer service and support in a timely manner or meet quality standards could reduce our profits and have detrimental effects on our business, financial condition, and results of operations. Clients may also take legal action against us or impose penalties, potentially resulting in

provisions for doubtful accounts, extended accounts receivable collection cycles, or litigation expenses. Such events may also harm our reputation and lead to the loss of existing and prospective clients, ultimately negatively affecting our business outlook, financial performance, and financial health.

Our revenues heavily rely on our reputation and positive recommendations from our current customers. Failing to maintain high-quality customer and product support, or a perception in the market that we do not uphold these standards, could have adverse consequences for our reputation, our ability to lease IT products to existing and new customers, and, in turn, our business, financial performance, and financial condition.

15. We may face Potential Damage and Loss of IT Equipment.

IT Equipment damage and loss is a significant risk for us being engaged in the business of IT equipment rental services. This risk pertains to the potential damage, loss, or theft of the IT equipment that a company rents to its clients. Rental IT equipment can suffer physical damage during use. This damage can result from accidents, mishandling, or unforeseen events. Some common scenarios include spills on laptops, accidental drops, and equipment overheating. Further, if we fail to protect our IT equipments, our business, prospects, financial condition and results of operations may be materially and adversely affected.

16. Our ability to maintain continuing relationships with our customers is essential to the growth, profitability and the results of operations. Any impairment of our long-term relationships with our customers would adversely affect our business, results of operations and financial conditions.

Our capacity to maintain ongoing customer relationships is pivotal for our growth, profitability, and operational results. To enhance our operational outcomes, it's imperative that we establish, maintain, and expand connections with both new and existing customers, while also ensuring that our existing customers continue to utilize our IT equipment. Notably, our customers are typically not bound by contractual obligations to renew, upgrade, or expand their engagements with us, as we lack exclusive arrangements with them. The expansion of our business is somewhat contingent on customers increasing their usage of our products, which can be challenging to predict.

The ability to renew or expand customer relationships may be subject to fluctuations due to several factors. These include customer satisfaction or dissatisfaction with our services, the reliability of our offerings, our pricing structure, the impact of general economic conditions, competitive alternatives, or reductions in customer spending levels. Moreover, the decision of our customers to expand their adoption of our products hinges on various factors, such as general economic conditions, the effectiveness and value proposition of our products, the performance of our sales and customer support teams in assisting customers, and customer satisfaction with our products and support services. If our endeavors to expand within our existing customer base prove unsuccessful, it could have adverse implications for our business operations and financial performance.

17. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.

As on date of this Draft Prospectus we have obtained Bharat Sookshma Udyam Suraksha Insurance Policy covering risk relating to fire, earthquake and terrorism in respect of Computers, peripherals, laptops, server quad core, routers, switches, air conditioners, furniture & fixtures & electrical fittings. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks such as insurance of equipments installed at clients premises, assets located at branch offices, loss of profits, goods in transit, cash in transit and keyman insurance. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

18. The Promoters will hold significant part of the equity shares of the Company post the proposed Issue and will continue to control the Company.

After the Issue is completed, our Promoters will collectively own upto 73.50% of the Company's equity shares. As a result, our Promoters will have the ability to determine the outcome of all actions requiring the approval of shareholders. The interests of our Promoters may conflict with the interest of the other investors, and investors

may not agree with the way in which the Promoters exercise their voting rights and powers. This could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, take-over or other business combination involving the Company, discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company.

19. Loans availed by our Company has been secured on personal properties and guarantees of our Directors, Promoters, Promoter Group, Group Companies and third party. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected in case of invocation of any personal guarantees provided by our Directors, Promoters, Promoter Group, Group Companies and third party.

Loans availed by our Company has been secured on personal properties and guarantees of our Directors, Promoters, Promoter Group, Group Companies and third party. In the event of default on such borrowings, these personal guarantees may be invoked by our lenders thereby adversely affecting our Promoters' ability to manage the affairs of our Company and this, in turn, could adversely affect our business, prospects, financial condition and results of operations. Further, if any of these personal guarantees are revoked by our Directors, Promoters, Promoter Group, Group Companies and third party, we may also not be successful in procuring alternate securities or guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details regarding loans availed by our Company, please refer "**Financial Indebtedness**" on page 192 of this Draft Prospectus.

20. Our historical performance is not indicative of our future growth or financial results and we may not be able to sustain our historical growth rates.

Our business has experienced significant growth in previous financial year. Our revenue from operations has increased from ₹ 1,227.32 lakhs for Financial Year ended March 31, 2022 to ₹ 1,748.17 lakhs for the Financial Year ended March 31, 2023 and ₹ 1,008.41 lakhs for the six months period ended September 30, 2023. We cannot assure you that we will be able to sustain the levels of revenue growth that we have had in the past. There is no assurance that we will be able to maintain our past rate of growth and succeed in realizing our growth strategy. Further, several of our strategic initiatives are in initial stages. While we may experience initial success with such initiatives, there is no assurance that these will succeed in the long term.

21. Security breaches and any disruptions to our information technology could adversely impact our business.

We seek to protect our computer systems and network infrastructure from security breaches and other disruptive problems caused by our increased internet connectivity. We employ security systems, including firewalls and password encryption, designed to minimize the risk of security breaches but there can be no assurance that these security measures will be successful. Breaches of our security measures could affect the security of information stored in and transmitted through these computer systems and network infrastructure. A failure in security measures could have a material adverse effect on our business and our future financial performance. Our business relies on information technology to operate on a daily basis. The success of our businesses depends in part upon the ability to store, retrieve, process and manage substantial amounts of information. Any disruption in our information technology systems could render us unable to operate our business. This could adversely affect our business, reputation and revenues.

22. Our Promoters, Directors and Key Management Personnel may have interests other than reimbursement of expenses incurred and receipt of remuneration or benefits from our Company. Certain of our Promoters and Directors may have interest in entities, which are in businesses like ours and this may result in conflict of interest with us.

Certain of our Promoters, Directors and Key Management Personnel are interested in us, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding, direct and indirect, and our stock options and benefits arising therefrom. Our Promoters are also interested in us to the extent of their shareholding in us and any benefits arising therefrom. Further, certain of our Promoters and Directors may have an interest in entities to the extent of their shareholding and/or directorships, which are in businesses similar to ours and this may result in conflict of interest with us.

23. We have in the past entered related party transactions and may continue to do so in the future.

After incorporation, our Company has entered into transactions with certain of our related parties. While we confirm that all such transactions have been conducted on an arm's length basis as per the applicable provisions of Companies Act or any other applicable laws, however, there can be no assurance that we could not have

achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to “**Annexure V Related Party Transactions**” in Section “**Restated Financial Statements**” beginning on page 143 of this Draft Prospectus.

24. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior shareholders’ approval.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in the Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilization of the Net Proceeds, we may not be able to obtain the shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders’ approval may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Offer as prescribed in the SEBI ICDR Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition and may adversely affect our business and results of operations. For further details of the proposed objects of the Offer, refer chapter titled “**Objects of the Issue**” on page 65 of this Draft Prospectus.

25. Our future funds requirements, in the form of issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

26. We have not commissioned an industry report for the disclosures made in the section titled “Industry Overview” and made disclosures based on the data available on the internet and such data has not been independently verified by us.

We have not commissioned an industry report for the disclosures made in the chapter titled “**Industry Overview**” beginning of page 81 and made disclosures based on the data available on the internet and such data has not been independently verified by us. We have made disclosures in the said chapter based on the relevant industry-related data available online for which relevant consents have been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Prospectus. Further, the industry data mentioned in this Draft Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Prospectus in this context.

27. We face credit risk from our customers, and the ability to recover our trade receivables is uncertain.

We typically grant our customers a credit period of 90 days for the rental of IT products, which exposes us to credit risk. At the close of half year ended September 30, 2023 and for the Fiscals 2023, 2022 and 2021, our trade receivables stood at ₹ 699.62, ₹ 677.32, ₹ 823.52 and ₹ 1,159.18 lakhs respectively, with trade receivable turnover days at 123 days in half year ended September 30, 2023, 157 days in Fiscal 2023, 210 days in Fiscal 2022 and 346 days in Fiscal 2021. The ability of our customers to make timely payments hinges on a variety of factors beyond our control, such as general economic and market conditions, as well as the customer's cash flow position.

Delays in receiving payments from customers can have adverse implications for our cash flow and our capacity to fulfill our working capital needs. There is no guarantee that our customers will make payments in a timely manner, if at all, which could negatively impact the recoverability of our trade receivables. Furthermore, efficiently managing the level of bad debt resulting from delayed payments is not assured. In the event that we

cannot recover these payments, it could have a detrimental effect on our business, financial standing, and operational results.

28. Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by any bank or financial institution or any other independent agency and our management will have broad discretion over the use of the Net Proceeds.

We intend to utilize the Net Proceeds of the Offer as set forth in “*Objects of the Issue*” beginning on page 65 of this Draft Prospectus. The funding requirements mentioned as a part of the objects of the Offer are based on internal management estimates in view of past expenditures and have not been appraised by any bank or financial institution. This is based on current conditions and is subject to change in light of changes in external circumstances, costs, business initiatives, other financial conditions or business strategies and since we have not presently entered into any definitive agreements for the use of Net Proceeds. Various risks and uncertainties, including those set forth in this section, may limit or delay our efforts to use the Net Proceeds to achieve profitable growth in our business. For example, we may also use funds for future businesses and products which may have risks significantly different from what we currently face or may expect. Accordingly, use of the Net Proceeds for other purposes identified by our management may not result in actual growth of our business, increased profitability or an increase in the value of our business and your investment. For further details, please see “*Objects of the Issue*” beginning on page 65 of this Draft Prospectus.

29. Our ability to pay dividends in the future will depend on our future earnings, cash flows, working capital requirements, capital expenditures and financial condition.

Our Company has not declared any dividends in the last three Fiscals, and the period from April 1, 2023, until the date of this Draft Prospectus. The amount of our future dividend payments, if any, will be at the sole discretion of our Board of Directors and will depend on our future earnings, cash flows, working capital requirements, capital expenditures and financial condition, applicable Indian legal restrictions and other factors. There can be no assurance that we will pay dividends. We may decide to retain all our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. Additionally, in the future, we may be restricted by the terms of our financing agreements in making dividend payments unless otherwise agreed with our lenders. We may be unable to pay dividends in the near or medium term and our future dividend policy will depend on our capital requirements, financial condition and results of operations. For further details, see “*Dividend Policy*” on page 142.

30. Failure to effectively manage employees or failure to ensure availability of sufficient employees could affect the business operations of the Company.

Our business activities are dependent on availability of skilled IT technicians. Non-availability of such employees at any time or any disputes with them may affect our services and timely delivery of our products to customers which may adversely affect our business and result of operations. Though we have not faced any employees shortage in the past we cannot assure that we will not experience disruptions to our operations due to disputes or other problems with our work force, which may lead to strikes or increased salary demands, which could have adverse effect on our business, and results of operations.

31. Increases in wages for IT professionals could reduce our cash flows and profit margins.

Historically, wage costs in the Indian IT services industry have been significantly lower than wage costs in developed countries for comparable skilled technical personnel, which has been one of India’s competitive strengths. However, wage increases in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. In the long term, wage increases may make us less competitive unless we are able to continue increasing the efficiency and productivity of our professionals and the quality of our services and the prices we can charge for our products and services. Increases in wages, including an increase in the cash component of our compensation expenses, may reduce our cash flow resulting in affecting our business operations.

32. The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.

The company’s operating results may fluctuate or adversely vary from past performances in the future due to a number of factors, many of which are beyond the company’s control. The results of operations during any financial year or from period to period may differ from one another or from the expected results operation. Its business, results of operations and financial condition may be adversely affected by, inter alia, a decrease in the

growth and demand for the products offered by the us or any strategic alliances which may subsequently become a liability or non-profitable. Due to various reasons including the above, the future performance may fluctuate or adversely vary from our past performances and may not be predictable. For further details of our operating results, section titled **“Financial Statements”** beginning on page **143** of this Draft Prospectus.

33. We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions.

We require certain statutory and regulatory permits, licenses and approvals to operate our business. Though we believe that we have obtained those permits and licenses which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Failure by us to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

34. We have to update the name of our company in some of the statutory approvals and certificates due to the conversion of Company from Private Limited into the Public Limited Company.

Our Company was converted from a Private Limited Company to a Public Limited Company and a fresh certificate of incorporation dated October 26, 2023, was issued by the Registrar of Companies, Mumbai. However, the name change of the Company is yet to be reflected in certain statutory approvals and certificates of the Company. For more information about the licenses required in our business, please refer section **“Government and Other Statutory Approvals”** beginning on page **201** of this Draft Prospectus.

35. We have incurred indebtedness and an inability to comply with repayment and other covenants in our financing agreements could adversely affect our business and financial condition. Further, certain of our financing agreements involve variable interest rates and an increase in interest rates may adversely affect our results of operations and financial condition.

As on September 30, 2023, we have total amount of outstanding borrowings of ₹ 2,117.57 Lakhs, from Bharat Co-Operative Bank (Mumbai) Ltd.. Some of the financing facilities availed by us include such covenants that make an obligation on our Company to obtain lending institution consent before carrying out certain activities and /or entering into certain transactions, to this end the Company has obtained No Objection Certificate from the said Bank for the proposed IPO. On being Failure to adhere all those covenants which are obligatory on the part of our company could have significant repercussion on our business & operations overall company's financial health as well. These covenants may vary depending on the requirements of the financial institution / lending banks / lending entity, providing such financing facilities and the conditions negotiated under each financing agreement.

While we have not defaulted on any covenants in financing agreements in the past, we cannot assure you that this will continue to be the case in the future. A failure to adhere all the covenants required under our financing arrangements or to obtain necessary consents/ waivers, constitute defaults under the relevant financing agreements and will render the respective lenders to declare a default against us and enforce remedies under the terms of the financing agreements. Further, during any period in which we are in default, we may be unable to raise, or face difficulties raising, further financing. A default by us under the terms of any financing agreement may also trigger a cross-default under some of our other financing agreements, or any other agreements or instruments of our containing cross-default provisions, which may individually or in aggregate, have an adverse effect on our operations, financial position and credit rating. For details of our borrowings, see **“Financial Indebtedness”** on page **192**.

Further, we are susceptible to changes in interest rates and the risks arising therefrom. Further, in recent years, the GOI has taken measures to control inflation, which included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows, and financial condition.

36. Excessive dependence on Bharat Co-Operative Bank (Mumbai) Ltd in respect of loan facilities obtained by our Company.

Our company has been sanctioned credit facilities by Bharat Co-Operative Bank (Mumbai) Ltd. The Company is

dependent on such facility for its Term loans, working capital facility and other funding requirement and any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. At the same time this may result into difficulty in arranging for funds for re-payment and may also adversely affect the financial position of the Company.

37. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI ICDR Regulations, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

EXTERNAL RISK FACTORS

38. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

39. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, financial condition, results of operations, cash flows and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For instance, the Companies Act 2013, several provisions of which (including rules issued thereunder) contain significant changes to Indian company law, including in relation to the issue of capital by companies, related party transactions, corporate governance, audit matters, shareholder class actions, restrictions on the number of layers of subsidiaries and corporate social responsibility. Compliance with such requirements may require significant financial and administrative resources, and any failure to comply may adversely affect our business and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. If a determination is made that we were in violation of such laws, rules or regulations, including conditions in the permits required for our operations, we may have to pay fines, modify or discontinue our operations, incur additional operating costs or make capital expenditures and our business, financial positions, results of operations or cash flows could be adversely affected. For details on the laws currently applicable to the Company kindly refer the section titled “*Key Industry Regulations and Policies*” beginning on page 101 of this Draft Prospectus.

40. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.

Taxes and other levies imposed by the Central or State Governments in India affect the cost and prices of the products we trade in and therefore demand for such product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

41. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and exhibitions, conferences and events industry contained in this Draft Prospectus.

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy and the exhibitions, conferences and events industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such

materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the section titled **“Industry Overview”** beginning on page 81 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

42. The extent and reliability of Indian infrastructure could adversely affect our Company’s results of operations and financial condition.

India’s physical infrastructure is in a developing phase, as compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company’s normal business activity. Any deterioration of India’s physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company’s business operations, which could have an adverse effect on its results of operations and financial condition.

43. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

44. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

45. Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

46. A slowdown in economic growth in India and globally could cause our business to suffer.

We are highly dependent on prevailing economic conditions in India and globally and our results of operations are significantly affected by factors influencing the Indian and global economy. A slowdown in the economy and per capita income could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy. Factors that may adversely affect the Indian and global economy and per capita income, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing;

- prevailing income conditions among Indian and global consumers and corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India and other countries.

Any slowdown in the Indian or global economy and per capita income or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

47. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

48. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

49. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time-to-time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

ISSUE RELATED

50. An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

51. The Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the

Issue.

The Issue Price of the Equity Shares will be determined by our Company in consultation with the and the Lead Manager, and through Fixed Price Process. This price will be based on numerous factors, as described under “**Basis for Issue Price**” beginning on page 72 of this Draft Prospectus and may not be indicative of the market price for the Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that the investor will be able to resell their Equity Shares at or above the Issue Price.

52. Our Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

53. Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoters or other shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors’ shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares

54. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE Limited in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted unless the post issue formalities are completed after the Equity Shares have been issued. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

55. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder’s ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

56. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale

of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹100,000, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows. The Government of India had announced the union budget for financial year 2023 and the Finance Act, 2022 received assent from the President of India on March 30, 2022. There is no certainty about the impact that the Finance Act, 2022 may have on our business and operations or in the industry we operate in.

57. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

58. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

GLOBAL ECONOMY OVERVIEW

- *Global growth is projected to fall from an estimated 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024. While the forecast for 2023 is modestly higher than predicted in the April 2023 World Economic Outlook (WEO), it remains weak by historical standards. The rise in central bank policy rates to fight inflation continues to weigh on economic activity. Global headline inflation is expected to fall from 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.*
- *In most economies, the priority remains achieving sustained disinflation while ensuring financial stability. Therefore, central banks should remain focused on restoring price stability and strengthening financial supervision and risk monitoring. Should market strains materialize, countries should provide liquidity promptly while mitigating the possibility of moral hazard. They should also build fiscal buffers, with the composition of fiscal adjustment ensuring targeted support for the most vulnerable. Improvements to the supply side of the economy would facilitate fiscal consolidation and a smoother decline of inflation toward target levels.*

The global economy continues to gradually recover from the pandemic and Russia’s invasion of Ukraine. In the near term, the signs of progress are undeniable.

The COVID-19 health crisis is officially over, and supply-chain disruptions have returned to pre-pandemic levels. Economic activity in the first quarter of the year proved resilient, despite the challenging environment, amid surprisingly strong labour markets. Energy and food prices have come down sharply from their war-induced peaks, allowing global inflation pressures to ease faster than expected. And financial instability following the March banking turmoil remains contained thanks to forceful action by the US and Swiss authorities.

Yet many challenges still cloud the horizon, and it is too early to celebrate.

Under our baseline forecast growth will slow from last year’s 3.5 percent to 3 percent this year and next, a 0.2 percentage points upgrade for 2023 from our April projections. Global inflation is projected to decline from 8.7 percent last year to 6.8 percent this year, a 0.2 percentage point downward revision, and 5.2 percent in 2024.

Growth projections

The global economic outlook for this year is slightly brighter, but growth remains weak.

(GDP, percent; year-on-year)

Sources: IMF, World Economic Outlook; and IMF staff calculations.
 Note: The 3% global growth estimate for 2023 reflects upgrade from 2.8% in the April World Economic Outlook.

The slowdown is concentrated in advanced economies, where growth will fall from 2.7 percent in 2022 to 1.5 percent this year and remain subdued at 1.4 percent next year. The euro area, still reeling from last year's sharp spike in gas prices caused by the war, is set to decelerate sharply.

By contrast, growth in emerging markets and developing economies is still expected to pick-up with year-on-year growth accelerating from 3.1 percent in 2022 to 4.1 percent this year and next. (The corresponding annual growth, shown on the chart below, is 4 percent for 2022 and 2023 and 4.1% for 2024.)

This average, however, masks significant differences between countries, with emerging and developing Asia growing strongly at 5.3 percent this year, while many commodity producers will suffer from a decline in export revenues.

Risks

Stronger growth and lower inflation than expected are welcome news, suggesting the global economy is headed in the right direction. Yet, while some adverse risks have moderated, the balance remains tilted to the downside.

First, signs are growing that global activity is losing momentum. The global tightening of monetary policy has brought policy rates into contractionary territory. This has started to weigh on activity, slowing the growth of credit to the non-financial sector, increasing households' and firms' interest payments, and putting pressure on real estate markets. In the United States, excess savings from the pandemic-related transfers, which helped households weather the cost-of-living crisis and tighter credit conditions, are all but depleted.

In China, the recovery following the re-opening of its economy shows signs of losing steam amid continued concerns about the property sector, with implications for the global economy.

Second, core inflation, which excludes energy and food prices, remains well above central banks' targets, and is expected to decline gradually from 6 percent this year to 4.7 percent in 2024, a 0.4 percentage points upward revision. More worrisome, core inflation in advanced economies is expected to remain unchanged at a 5.1 percent annual average rate this year, before declining to 3.1 percent in 2024. Clearly, the battle against inflation is not yet won.

Headline inflation

Inflation is coming down, but the pace of disinflation is slowing.
(world; percent; year-on-year)

Sources: IMF, World Economic Outlook; and IMF staff calculations.

IMF

Key to inflation's persistence will be labour market developments and wage-profit dynamics. Labour markets remain a particularly bright spot, with unemployment rates below, and employment levels above, their pre-COVID levels in many economies. Overall wage inflation has increased but remains behind price inflation in most countries. The reason is simple and has little to do with so-called "greedflation": prices adjust upward faster than wages when nominal demand far exceeds what the economy can produce. As a result, real wages have declined, by about 3.8 percent between the first quarter of 2022 and 2023 for advanced and large emerging market economies.

Lower real wages translate to reduced labour costs. This may explain part of the strength of the labour market despite slowing growth. But in many countries, the observed increase in employment goes beyond what the decline in labour

costs would suggest. It is fair to say that the reasons are not fully understood.

If labour markets remain strong, we should expect—and welcome—real wages recovering lost ground. This means nominal wage growth will remain strong for a while even as price inflation declines. Indeed, the gap between the two has started to close. Because average firms’ profit margins have grown robustly in the last two years, I remain confident that there is room to accommodate the rebound in real wages without triggering a wage-price spiral. With inflation expectations well-anchored in major economies, and the economy slowing, market pressures should help contain the pass-through from labour costs to prices.

Wage-price spiral risks?

Real wage growth recovery mostly due to declining inflation.
(deviation from t=0, percentage point)

Sources: ILO, OECD, US BEA, and IMF staff calculations.
Note: Inflation is the year-on-year percent change in the CPI. Growth is calculated year-on-year. Nominal and real wages are defined on a per worker basis. The real wage is the nominal wage divided by the CPI. The figure shows developments following episodes in which at least three of the preceding four quarters have (1) accelerating prices/rising price inflation, (2) positive nominal wage growth, (3) falling or constant real wages, and (4) a declining or flat unemployment rate. 23 such episodes are identified within a sample of 33 advanced economies. The Covid-19 episode is the average of countries in the sample starting in 2021:Q4. See October 2022 WEO Chapter 2 for details.

These labour market developments matter enormously. In the near term, should economic conditions deteriorate, the risk is that firms might reverse course and sharply scale down employment. Separately, the strong recovery in employment, coupled with only modest increases in output, indicates that labour productivity—the amount of output per hour worked—has declined. Should this trend persist, this would not bode well for medium-term growth.

Policies

Hopefully, with inflation starting to recede, we have entered the final stage of the inflationary cycle that started in 2021. But hope is not a policy, and the touchdown may prove quite tricky to execute. Risks to inflation are now more balanced and most major economies are less likely to need additional oversized increases in policy rates. Rates have already peaked in some Latin American economies. Yet, it is critical to avoid easing rates prematurely, that is, until underlying inflation shows clear and sustained signs of cooling. We are not there yet. All the while, central banks should continue to monitor the financial system and stand ready to use their other tools to maintain financial stability.

After years of heavy fiscal support in many countries, it is now time to gradually restore fiscal buffers, and put debt dynamics on a more sustainable footing. This will help to safeguard financial stability and to reinforce the overall credibility of the disinflation strategy. This is not a call for generalized austerity: the pace and composition of this fiscal consolidation should be mindful of the strength of private demand, while protecting the most vulnerable. Yet, some consolidation measures seem entirely appropriate. For instance, with energy prices back to their pre-pandemic levels, many fiscal measures, such as energy subsidies, should be phased out.

Fiscal space is also key to implement many needed structural reforms, especially in emerging and developing economies. This is especially important since prospects for medium-term growth in income per capita have dimmed over the past decade. The slowdown is sharper for low- and middle-income economies relative to high-income ones. In other words, prospects for catching up to higher living standards have diminished markedly. At the same time, elevated debt levels are preventing many low income and frontier economies from making the investments they

need to grow faster, with high risks of debt distress in many places. Recent progress toward debt resolution for Zambia is encouraging, but faster progress for other highly indebted countries is urgently needed.

Slowing convergence

The outlook for income per capita growth has dimmed middle- and low-income economies in recent years.

Note: For India, data and forecasts are presented on a fiscal year basis, with FY 2022/2023 (starting in April 2022) shown in the 2022 column. India's growth projections are 6.6 percent in 2023 and 5.8 percent in 2024 based on calendar year.

Some of the slowdown in growth reflects the spillover of harmful policies. The rise of geoeconomic fragmentation with the global economy splitting into rival blocs, will most harm emerging and developing economies that are more reliant on an integrated global economy, direct investment, and technology transfers. Insufficient progress on the climate transition will leave poorer countries more exposed to increasingly severe climate shocks and rising temperatures, even as they account for a small fraction of global emissions. On all these issues, multilateral cooperation remains the best way to ensure a safe and prosperous economy for all.

GROWTH IN GLOBAL TRADE BY THE WORLD TRADE ORGANISATION, FROM 3.5 PER CENT IN 2022 TO 1.0 PER CENT IN 2023

India to witness GDP growth of 6.0 per cent to 6.8 per cent in 2023-24, depending on the trajectory of economic and political developments globally.

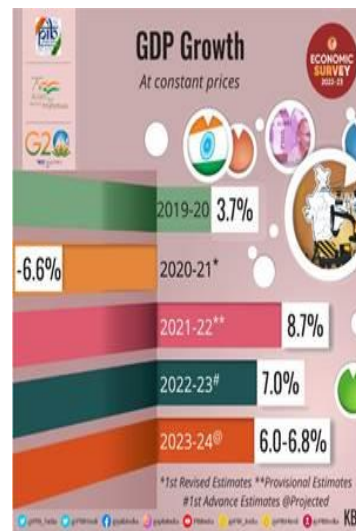

The optimistic growth forecasts stem from a number of positives like the rebound of private consumption given a boost to production activity, higher Capital Expenditure (Capex), near-universal vaccination coverage enabling people to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, as well as the return of migrant workers to cities to work in construction sites leading to a significant decline in housing market inventory, the strengthening of the balance sheets of the Corporates, a well-capitalised public sector banks ready to increase the credit supply and the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector to name the major ones.

The Union Minister for Finance & Corporate Affairs Smt. Nirmala Sitharaman tabled the Economic Survey 2022-23 in Parliament today, which projects a baseline GDP growth of 6.5 per cent in real terms in FY24. The projection is broadly comparable to the estimates provided by multilateral agencies such as the World Bank, the IMF, and the ADB and by RBI, domestically.

The Survey says, in real terms, the economy is expected to grow at 7 per cent for the year ending March 2023. This follows an 8.7 per cent growth in the previous financial year.

Despite the three shocks of COVID-19, Russian-Ukraine conflict and the Central Banks across economies led by Federal Reserve responding with synchronised policy rate hikes to curb inflation, leading to appreciation of US Dollar and the widening of the Current Account Deficits (CAD) in net importing economies, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23.

It also points out that the upside to India’s growth outlook arises from (i) limited health and economic fallout for the rest of the world from the current surge in Covid-19 infections in China and, therefore, continued normalisation of supply chains; (ii) inflationary impulses from the reopening of China’s economy turning out to be neither significant nor persistent; (iii) recessionary tendencies in major Advanced Economies (AEs) triggering a cessation of monetary tightening and a return of capital flows to India amidst a stable domestic inflation rate below 6 per cent; and (iv) this leading to an improvement in animal spirits and providing further impetus to private sector investment.

The Survey says, the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector has been remarkably high, over 30.6 per cent, on average during Jan-Nov 2022, supported by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) of the Union government. It adds that the recovery of MSMEs is proceeding apace, as is evident in the amounts of Goods and Services Tax (GST) they pay, while the Emergency Credit Linked Guarantee Scheme (ECGLS) is easing their debt servicing concerns.

Apart from this, increase in the overall bank credit has also been influenced by the shift in borrower’s funding choices from volatile bond markets, where yields have increased, and external commercial borrowings, where interest and hedging costs have increased, towards banks. If inflation declines in FY24 and if real cost of credit does not rise, then credit growth is likely to be brisk in FY24.

India’s Economic Resilience and Growth Drivers

The Survey points out that factors like monetary tightening by the RBI, the widening of the CAD, and the plateauing growth of exports have essentially been the outcome of geopolitical strife in Europe. As these developments posed downside risks to the growth of the Indian economy in FY23, many agencies worldwide have been revising their growth forecast of the Indian economy downwards. These forecasts, including the advance estimates released by the NSO, now broadly lie in the range of 6.5-7.0 per cent.

Despite the downward revision, the growth estimate for FY23 is higher than for almost all major economies and even slightly above the average growth of the Indian economy in the decade leading up to the pandemic.

Manufacturing and investment activities consequently gained traction. By the time the growth of exports moderated, the rebound in domestic consumption had sufficiently matured to take forward the growth of India’s economy. Private Consumption as a percentage of GDP stood at 58.4 per cent in Q2 of FY23, the highest among the second quarters of all the years since 2013-14, supported by a rebound in contact-intensive services such as trade, hotel and transport, which registered sequential growth of 16 per cent in real terms in Q2 of FY23 compared to the previous quarter.

Although domestic consumption rebounded in many economies, the rebound in India was impressive for its scale. It contributed to a rise in domestic capacity utilisation. Domestic private consumption remains buoyant in November 2022. Moreover, RBI's most recent survey of consumer confidence released in December 2022 pointed to improving sentiment with respect to current and prospective employment and income conditions.

The Survey also points to another recovery and adds that the "release of pent-up demand" was reflected in the housing market too as demand for housing loans picked up. Consequently, housing inventories have declined, prices are firming up, and construction of new dwellings is picking up pace and this has stimulated innumerable backward and forward linkages that the construction sector is known to carry. The universalisation of vaccination coverage also has a significant role in lifting the housing market as, in its absence, the migrant workforce could not have returned to construct new dwellings.

India's Inclusive Growth

The Survey emphasises that growth is inclusive when it creates jobs. Both official and unofficial sources confirm that employment levels have risen in the current financial year, as the Periodic Labour Force Survey (PLFS) shows that the urban unemployment rate for people aged 15 years and above declined from 9.8 per cent in the quarter ending September 2021 to 7.2 per cent one year later (quarter ending September 2022). This is accompanied by an improvement in the labour force participation rate (LFPR) as well, confirming the emergence of the economy out of the pandemic-induced slowdown early in FY23.

In FY21, the Government announced the Emergency Credit Line Guarantee Scheme, which succeeded in shielding micro, small and medium enterprises from financial distress. A recent CIBIL report (ECLGS Insights, August 2022) showed that the scheme has supported MSMEs in facing the COVID shock, with 83 per cent of the borrowers that availed of the ECLGS being micro-enterprises. Among these micro units, more than half had an overall exposure of less than Rs10 lakh.

Furthermore, the CIBIL data also shows that ECLGS borrowers had lower non-performing asset rates than enterprises that were eligible for ECLGS but did not avail of it. Further, the GST paid by MSMEs after declining in FY21 has been rising since and now has crossed the pre-pandemic level of FY20, reflecting the financial resilience of small businesses and the effectiveness of the pre-emptive government intervention targeted towards MSMEs.

Moreover, the scheme implemented by the government under the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) has been rapidly creating more assets in respect of "Works on individual's land" than in any other category. In addition, schemes like PM-KISAN, which benefits households covering half the rural population, and PM Garib Kalyan Anna Yojana have significantly contributed to lessening impoverishment in the country.

The UNDP Report of July 2022 stated that the recent inflationary episode in India would have a low poverty impact due to well-targeted support. In addition, the National Family Health Survey (NFHS) in India shows improved rural welfare indicators from FY16 to FY20, covering aspects like gender, fertility rate, household amenities, and women

empowerment.

So far, India has reinforced the country's belief in its economic resilience as it has withstood the challenge of mitigating external imbalances caused by the Russian-Ukraine conflict without losing growth momentum in the process. India's stock markets had a positive return in CY22, unfazed by withdrawals by foreign portfolio investors. India's inflation rate did not creep too far above its tolerance range compared to several advanced nations and regions.

India is the third-largest economy in the world in PPP terms and the fifth largest in market exchange rates. As expected of a nation of this size, the Indian economy in FY23 has nearly "recouped" what was lost, "renewed" what had paused, and "re-energised" what had slowed during the pandemic and since the conflict in Europe.

Goods and Services Tax Act, 2017

The Government of India has introduced the GST regime with effect from July 1, 2017. As per Section 8 of the CGST Act, selling gold ornaments or jewellery to the common man is a composite supply of goods and services. The gold used is considered goods and making charges or value addition is towards job work. Since the principal supply is the sale of gold, the GST rate of 3% shall be levied instead of 5% on the total value of jewellery, whether or not making charges is shown separately. A GST exemption was announced at the 31st GST Council meeting on 22 December 2018. Accordingly, GST is not charged for the supply of gold made by the notified agency to GST-registered gold jewellery exporters. The move has minimised the GST burden on Indian exporters of gold jewellery and probably made Indian gold exports more competitive on the world market. The jeweller or gold merchant can claim Input Tax Credit (ITC) paid on the raw materials used, i.e., gold and other job work charges incurred. Even when the gold merchant pays tax on a reverse charge basis for supply from an unregistered job worker, he can claim the ITC on such tax.

Our group company, Mangal Credit and Fincorp Limited has filed 17 complaints under Section 138 of Negotiable Instruments Act, 1881 in relation to dishonour of cheques issued in its favour which are currently, pending at different stages of adjudication before Court of LD Metropolitan Magistrate at Mumbai. The status before the Hon’ble Court is still pending and, therefore, we have considered such cases as pending.

2. Other Pending Litigations

1. Our group company, Mangal Royal Jewels Private Limited (“**MRJPL**”) and Mangal Bullion Private limited (“**MBPL**”) (hereinafter MRJPL and MBPL are together called the “**Petitioners**”) have filed a writ petition

bearing number WMP/4248/2023 before Hon'ble Madras High Court ("**Matter 1**"). M/s Future Techniks Limited ("**FTL**") had obtained credit facilities from Canara Bank ("**Respondent 1**") and Mr. Jagadeesa, chief manager of Respondent 1 had fraudulently discharged credit facilities to the tune of Rs. 19.21 Crore. Respondent 1 had alleged that there were certain transactions made to various entities to siphon off the loan amounts in tune of Rs. 46.69 lakh. These amounts were received by MRJPL on account of purchase of gold by Mr. Sukesh Chandrasekar on belief that he was the director of FTL. The Respondent 1 had sought to recover the said amounts from MRJPL and MBPL. The matter relates to a complaint made by Respondent 1 to police authorities that the branch manager had violated bank guidelines by allowing overdrawing of the tune of Rs. 19.00 Crore. The Central Crime Branch, Tamil Nadu Police, Chennai based on the abovementioned complaint registered a FIR bearing number 64/2013 against the directors of FTL and chief manager of Canara Bank, Ambattur SME Branch, Padi, Chennai for alleged offences charged under Section 406, 409 and 420 of IPC. Further, an Enforcement Case Information Report No. 01/2013 was registered by the Joint Director, Directorate of Enforcement, Chennai ("**Respondent 2**"). Respondent 2 after investigations caused a provisional attachment order in No. 07/2013 ("**Provisional Order**") on bank account of MBPL to the tune of Rs. 4.61 Crore on allegations that the proceeds in the bank account were alleged to have been involved in money laundering transactions. Respondent 2 had also filed C.C No. 58 of 2016 under PMLA before jurisdictional court for PMLA offences. Thereafter Respondent 1 approached the principal sessions court in CrI.M.P No. 21812 of 2016 to recover the loan claiming that the monies attached and recovered by Respondent 2 should be released to Respondent 1 who claimed to be victim. The principal sessions court held that such petition is premature as release of the properties to Respondent 1 would inure only on completion of trial by the special court and an order passed in terms of Section 8(8) of PMLA. Respondent 1 appealed against the said order before Hon'ble High Court of Madras ("**High Court**") vide CrI.R.C No. 830 of 2017 wherein High Court remitted the case back to special court. The Provisional Order was confirmed by the adjudicating authority on which appeals were filed before the appellate tribunal for PMLA cases, New Delhi. The Hon'ble Appellate Tribunal vide order dated March 23, 2017 held that out of overall loan of Rs. 19.26 Crore there was nothing to show that there were any other transactions with Petitioners apart from Rs. 46.69 lakh with MRJPL and Rs. 51.25 lakh with MBPL. The Hon'ble Appellate Tribunal held that out of Rs. 4.61 Crore, sum of Rs. 97.94 lakh was allowed to be retained by Respondent 2 ("**Order 1**"). Respondent 2 against Order 1 approached High Court by way of C.M.A Nos. 1581-1582 of 2017. The High Court vide order dated August 29, 2019 confirmed Order 1 and in addition ordered Petitioners to furnish bank guarantee of Rs. 3.63 Crore ("**Order 2**"). Respondent 2 against Order 2 approached Hon'ble Supreme Court in Criminal Appeal nos. 1792-93 of 2022. The Hon'ble Supreme Court confirmed Order 2 vide their order dated August 17, 2022 ("**Order 3**"). On release of the amounts mentioned above attachment orders were passed by recovery officer – II, Debt Recovery Tribunal – III ("**DRT**") and the accounts were frozen against a liability of Rs. 29.56 Crore under D.R.C No. 392 of 2019 ("**Matter 2**"). After making enquiries with the recovery officers the Petitioners came to knowledge that Respondent 1 has initiated recovery proceedings before DRT in O.A No. 424 of 2014 which was ordered in favour of Respondent 1 vide order dated July 11, 2019. The DRT had ordered that Rs. 21.10 Crore was recoverable by Respondent 1 and liability of MRJPL and MBPL was for sum of 20.59 Crore and Rs. 4.60 Crore respectively ("**DRT Order**"). In consequence to DRT Order, a recovery certificate was initiated on December 17, 2019. No action of recovery was initiated from December 17, 2019 to November 17, 2022 and on November 17, 2022, the recovery officer attached to the DRT-III had issued summons to appear before him on November 22, 2022 for making objections against the recovery of Rs. 3.63 Crore released to DRT on directions of Hon'ble SC. The order of DRT and recovery certificate dated December 17, 2019 have caused the Petitioners immense prejudice as it burdens them with entire liability of the bank loan taken by M/s. Future Techniks when they have nothing to do with the loan transaction or agreement between the Respondent 1 and the M/s. Future techniks. In the present writ petition, the Petitioners have prayed to quash the above orders as the order of DRT and recovery certificate dated December 17, 2019 have caused the Petitioners prejudice as it put burden of entire loan amount on the Petitioners. The matters are presently pending.

2. Our group company, Mangal Buildhome Private Limited ("**Petitioner**") have filed an arbitration petition no. CARBP/191/2023 in Hon'ble Bombay High Court against Ulka Chandrashekhar Nair ("**Respondent**"). The matter related to the grant of development rights in respect of the subject matter property to the Petitioner and a power of attorney executed by the Petitioner in the favour of the Petitioner. The

Petitioner had paid a sum of 1,935.36 lakhs and incurred 117.36 lakhs towards the development of the subject matter property. The Respondent had failed to comply with the obligations and had terminated the power of attorney. The matter is presently pending.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs (and subsequently, all UPI Applicants) through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continued to be six Working Days during this phase.

Phase III: SEBI vide press release bearing number 12/2023 announced approval of proposal for reducing the time period for listing of shares in public issue from existing six working days to three working days and pursuant to SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"), this phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023. In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue will be made under UPI Phase III as notified in the T+3 Notification, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Applicants to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the LM responsible for post-offer activities will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. The issuers will be required to appoint one of the SCSBs as a sponsor bank(s) to act as conduits between the Stock Exchanges and NPCI in order to facilitate collection of requests and /or payment instructions of the UPI Applicants using the UPI.

If the Shares allocated on a proportionate basis to any category is more than the Shares allotted to the applicants in that category, the balance available Shares for allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising of applicants applying for the minimum number of Shares.
6. Since present issue is a fixed price issue, the allocation in the net Issue to the public category in terms of Regulation 253 of the SEBI ICDR Regulations shall be made as follows:

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. The Government of India makes policy announcements on FDI through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The consolidated FDI policy circular of 2020 dated October 15, 2020 issued by the DPIIT (formerly Department of Industrial Policy & Promotion) (“FDI Circular”) consolidates the policy framework which was in force as on October 15, 2020. Further, the FDI Circular consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DPIIT. The FDI Circular will be valid until the DPIIT issues an updated circular and shall be subject to FEMA Non-debt Instruments Rules.

As per the FDI Circular read with Press Note, 100% foreign direct investment is permitted under the automatic route for wholesale trading. In terms of Press Note 3 of 2020, dated April 17, 2020 (“Press Note”), issued by the DPIIT, the FDI Circular has been amended to state that all investments under the foreign direct investment route by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country will require prior approval of the Government of India. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Non-debt Instruments Rules.

Transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Circular and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Circular; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

For details of the aggregate limit for investments by NRIs and FPIs in our Company, see **“Issue Procedure – Bids by Eligible NRIs”** and **“Issue Procedure – Bids by FPIs”** beginning on page 224.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer. Each Bidder should seek independent legal advice about its to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Offer Period.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The Equity Shares offered in the Offer have not been and will not be registered under the U.S. Securities Act or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws.
